

SURVEY IN SYNTHESIS AND REACTIONS OF ORGANIC COMPOUNDS

NAGHAM MAHMOOD ALJAMALI

Department of Organic Chemistry, College of Education

ABSTRACT

In this review paper, information about organic compounds, methods of compounds synthesis , reactions , properties , stability , using as catalysis in various reactions in most of organic reactions ,ester , ether , carboxylic acid , amines compounds , aldehyde , ketones , acyl halide , amide ,anhydride , tests of organic compounds .

KEYWORDS: Nucleophilic, SN1, SN2, Synthesis, Alcohol, Aldehyde, Ketone, Amine, Carboxylic Acid, Ester, Ether, Reagents, Tests
