### ABSTRACT

*The article discusses the issues of industry based on the local mineral resources of the Republic of Karakalpakstan on the example of the activities of TebinBulak iron ore enterprises.*

*One of the main directions of the innovative development of the economy and the deepening of market reforms today is the improvement of the sectoral structure of industry, i.e. diversification of the region's industry. The regions of Uzbekistan have a large natural, land, mineral and labor potential. The implementation of these tasks will ensure economic balance in the regions of the republic, mitigate socio-economic and environmental problems, and create conditions for improving the living standards of the population.*

**KEY WORDS:** *Republic of Karakalpakstan, Tebinbulak, Improvement, Activities, Iron Ore Enterprises.*
