ABSTRACT

An interaction of industry, institute and the government on industrial policy may do miracle in a bid to remove malaise of industries, mainly sickness and/or closure, prevalent in small and medium enterprises. Industry may polish curricula whereas technical-institutions in return, may impart research-based latest knowledge. Government, on the third front can come forward to provide appropriate funds and other special sops or services to support the Industry. Undoubtedly, the aspiring engineers would be the working engineers of tomorrow, who may strengthen the entrepreneurial-base in the national economy. To meet the requirements of the industry and economy, synergic sound-interaction of Trio, may prove good and beneficial for industrial sickness/closure by socio-economic, technology-driven solutions, with an idea of cross-fertilization. This paper presents that the trinity may come forward with a solution to industrial sickness/closure prevalent today, by interaction, on give-and-take policy. Such socio-economic creativity is elaborated ahead in depth, with concrete suggestions.
