ABSTRACT

Academic libraries are performing their business more significantly than traditional libraries. It attracts users by providing contents in digital forms to save their time through open access movement. The Open access movement is focusing on the global perception. The academic libraries are providing the information in the digital form through web and Internet. The users are at liberty to access the required data based up dated latest study material quickly and timely at very economic rate. The users and readers have been connected with the global world, means that from each and every corner of globe they may get information as and when required.

“Information, knowledge, and culture are central to human freedom and human development. How they are produced and exchanged in our society critically affects the way we see the state of the world as it might be; who decides these questions; and how we, as societies and polities, come to understand what can be done”
