ABSTRACT

This study examines the factors influencing the collection development policies of the Visvesvaraya Technological University, India and the University of Wollongong, Dubai. A well-structured questionnaire was conducted among librarians at his Visvesvaraya Technological University in India and the University of Wollongong in Dubai to collect data on collection development in the library. The aim is to consider print and electronic resource collections, Web OPAC and online reference services, preferred means of communication with users, facilities and services that libraries provide to users, and various types of e-book subscriptions. - Journals from university libraries. They found the printout to be a library resource.
