ABSTRACT

Kleinsasser et al in 1968 first to describe speichelgang carcinoma, which is also called as salivary ductal carcinoma of the parotid. It is an aggressive salivary gland neoplasm. Salivary ductal carcinoma occurs exclusively in major salivary glands, parotid gland is a predominant site. It’s an aggressive epithelial tumor form of that shows greater similarities to that of ductal carcinoma of female breast. It most commonly affects male. Some cases it develops from pre-existing benign lesion of the parotid. We present an atypical case of salivary ductal carcinoma in a female and to offer some clinical importance of this a typical form of carcinoma of parotid

KEYWORDS: Speichelgang Carcinoma & Ductal Carcinoma of Female Breast
