ABSTRACT

Agricultural Economics Research Review (AERR) is an official publication of Agricultural Economics Research Association (India), which is a division of Agricultural Economics. A content analysis of this publication has been conducted in this article. It is focused on the natural resources, economic issues in the field of agriculture and the community involved. This paper is a result of the content analysis of the 20 issues of AERR published during January 2007 to December 2014. It gives more emphasis on the agriculture and economics issues related to it. It is a peer reviewed journal in the field of Agriculture and Economics. AERR is very useful for scientists, policymakers, environmentalists, Economists, Agricultural community and researchers. The Descriptive Research Method is used. The Data is Secondary in nature. It is a desktop research. It was found out from the study that the authors contributed in the journal are in large no. from Delhi region. The foreign contributors are very less in number. The research papers are more in number as compared to case studies.
