### ABSTRACT

*The present study was an effort to know the extent of Role performance of Village Panchayat Pradhan in Panchayati Raj Institution. The study was conducted in 9 C.D. Blocks in the four valley districts of Manipur. Dimension wise role performance results pointed that 57.79% and 53.24% performance of roles was found to be low in case of welfare related and general roles. However in following dimension respondents have performed medium level of roles in agriculture, village improvement activities, educational, and other related activities. Overall role performance of village Panchayat Pradhan was found to be medium (51.30%). It was inferred that relationship between independent variables i.e Annual income, Leadership preference and Achievement motivation had positive and significant effect on role performance of Village Panchayat Pradhan. However Family size, Material possession have negative and significant relation with role performance.*
