

SURVEY ON ARYL COMPOUNDS

NAGHAM MAHMOOD ALJAMALI

Organic Chemistry, Department of Chemistry, College of Education, Iraq

ABSTRACT

In this survey study , explanation about aryl and aromatic compounds , reactions , preparations , nomenclature ,examples. Examining all the reagents that could affect the rate gives us the composition of the reacting state. Then we explain (how the reaction occurs), position of reaction, mono and bicyclic compounds

KEYWORDS: Reaction, Synthesis, Naphthaline, Aryl, Attack, Benzene
