ABSTRACT

Now a day's cloud computing plays a major role in IT. It is not used for business activities but it is now also used for educational purposes. Cloud computing is just internet based computing you can say it is another properties of internet. customers plug into "cloud " and access applications ,services which is priced and on demand. In this paper we will discuss some case studies of cloud computing and reasons why cloud computing came in IT market. We will also show benefits of cloud computing, security aspects of cloud computing and a new approach for providing security in cloud computing. The implementation part shows that how we reduce security problem in cloud computing.

KEYWORDS: Cloud Computing, Infrastructure, Software as a Service (SaaS), Platform as a Service (PaaS), Infrastructure as a Service (IaaS), Denial of Service (dos)
