ABSTRACT

LaTeX is a family of programs designed to produce publication-quality typeset documents. Latex is portable document formatting system based on TEX. It is a typesetting language originally designed for math and science. Documentation is useful in our day to day life. For creating any educational related file, it needs Documentation. Documentation gives proper credit to the sources used in the argument. LaTeX gives richness to the Documentation. LaTeX uses a markup language in order to describe document structure and presentation. LaTeX converts source text, combined with the markup, into a high quality document. LaTeX works on any operating system such as Windows, Linux.
