ABSTRACT

India is one of the world's largest textile manufacturer and exporter. The apparel industry contributes 2.3% to India's GDP. The Micro Small Medium Enterprises (MSME) sector plays an important role in the Indian economy. They contribute 8% of GDP; more than 90% of the enterprises in India are MSMEs. ERP software is a software architecture that facilitates the flow of information among the different functions within an enterprise. Cloud-based computing is a revolution in the IT-market. ERP systems delivered as Software as a Service (SaaS) is receiving more focus from ERP vendors. The study aim is to design an ERP software which is functional and user friendly for MSME apparel companies. The software is designed within the restricted amount given by the buyer. This software development will help the MSME apparel industries to examine the ERP system at a low cost, develop the knowledge and skills on the ERP system.

KEYWORDS: ERP implementation & ERP software development
